

Recommendation Letter

To Whom It May Concern,

I am writing to recommend Sirine Achour for your organization. She was firstly employed in our office as a **frontend developer**, however as she showed her passion for automation, her position doubled also as a **devops engineer**.

Throughout her time with us, from April 2021 to September 2021, she demonstrated exemplary work ethic that made her a great collaborator at our company.

Sirine has shown proof of excellent technical skills as well as a lot of motivation and willingness to innovate. She is focused, organized and capable of working independently. She consistently delivered the desired results, and effectively multi-tasked to ensure that all assignments were completed promptly.

Additionally, she had a positive attitude and a good rapport with other teammates with whom she participated in a culture of sharing and learning.

Because of her effectiveness, I assigned her multiple critical tasks and she has always risen to the occasion. These tasks ranged from implementing a complex order life-cycle and developing a form builder to testing core functionalities and debugging.

In addition to that, she automated parts of the deployment procedure thus reducing errors and wasted time for the whole team.

Sirine went above and beyond in all her assignments.

She would be a great asset to any employer, and I wholeheartedly recommend her for any endeavor she chooses to pursue. Feel free to contact me if you have any questions.

Sincerely,

Chourouk Mzahi
